**Can Tell**

Many Americans work side by side with space aliens who look human — but you can spot these visitors by looking for certain tip-offs, say experts.

1. Odd or mismatched clothes.

"Often space aliens don't fully understand the different styles, so they wear combinations that are in bad taste, such as checked pants with a striped shirt or a tuxedo jacket with blue jeans or sneakers," noted Brad Steiger, a renowned UFO investigator and author.

2. Strange diet or unusual eating habits. Space aliens might eat French fries with a spoon or gobble down large amounts of pills.

4 Misuses everyday items.  
"A space alien may use correction fluid to paint its nails," said Steiger.

5. Constant questioning about customs of co-workers. Space aliens who are trying to learn about earth culture might ask questions that seem stupid, Easton said.

"For example, a co-worker may ask why so many Americans picnic on the Fourth of July," noted Steiger.

6. Secretive about personal life-style and home. "An alien won't discuss domestic details or talk about what it does at night or on week-ends," said Steiger.

7. Frequently talks to him- self. "A space alien may not be used to speaking as we do, so an alien may practice speaking," Steiger noted.

8. Displays a change of mood or physical reaction when near certain high-tech hardware. "An alien may experience a mood change when a microwave oven is turned on," said Steiger.

9. experts pointed out that a co-worker would have to display most if not all of these traits before you can positively identify him as a space alien.
