This book is made of two parts:

the first is based on statistical data, generally on global samples. Pages are from 1 to 32.

The second is based on surveys of reported data (perceptions, sensations, beliefs). Pages are from a to v.

You can read the two sections separately, or you can use the index to find links between the two.

Choose your subject, match the numbers and letters, and then overlap the pages.
the average progress on closing the
global gender gap
stands at
68.0%
95% of the gap in educational attainment

58% of the gap in economic participation

23% of the gap in political presence

34% of women

30% of men

had attained a tertiary education
14% of women and 39% of men who entered university chose science-related fields, including engineering, manufacturing, construction, and computing.

by the age of 27

23% of women
21% of men
who studied and planned to work as managers, work in such occupations
in the work force
4 out of 10 are women
in senior roles
2.4 out of 10 are women

Women earn between 66 cents and 76 cents to a man's dollar

Tunking Promise Into Practice

Cment Thornton, Women in Business 2016
Unpaid Care Work: The missing link in the analysis of gender gaps in labor outcomes, OECD, 2014

among all full-time workers, women earn about 79 cents to a man's dollar
on unpaid work

women spend on average 6 hours a day, men spend 2 hours a day

while doing the same job, women earn 71 cents to a man's dollar

(after accounting for age, race, hours and education)
23% of mothers were out of the workforce

10 years after graduation

in the U.S.A.

1% of fathers were out of the workforce

in politics, the average activity for women's issues

is 4.5 among women

and 3 among men

(where 1 is very active and 5 is not at all active)

19.2% of speakers of parliament are women

7.2% of heads of state are women

5.7% of women are women
7.2% of heads of state are women
5.7% of heads of government are women
19.1% of speakers of parliament are women

Women in Politics: 2017, Inter-Parliamentary Union and UN Women

9% of police officers
26% of prosecutors
27% of judges

in justice systems women accounted for

23% of mothers were out of the workforce
in media

24% of the people, heard, seen, or read are women

Global Media Monitoring Project, 2015

46% of news stories reinforcing gender stereotypes

1 in 3 women have experienced sexual violence

13% of stories focus on women

7% of them by a non-partner

Global Health Observatory, Violence against women 2016

994 rapists will walk free
marital rape: it is expressly decriminalized legislation does not explicitly address it as a crime rapist can marry their victims to avoid punishment

RAINN, American anti-sexual assault organization

in the U.S.A.

994 rapists will walk free

out of every 1,000 occurrences of rape

22
2 in 2 women killed, were killed by their partners or family

1 in 20 men killed, were killed in such circumstances

30% of every partnered women have experienced physical or sexual violence by a partner

WHO, 2013; Global Study on Homicide, UNODC, 2013
on average, women globally enter in a relationship 3.5 years before men.
84% of men and 72% of women in Europe are between the ages of 60 and 70 years.

33% of women and 6% of men who do not have a partner do not have sex between the ages of 50 and 60 years. See p. 109.
postfeminism, as a term, suggests that women have made plenty of progress because of feminism, but that feminism is now irrelevant and even undesirable. [...] postfeminism means that you can now work outside the home even in jobs previously restricted to men, go to graduate school, pump iron, and pump your own gas, as long as you remain fashion conscious, slim, nurturing, deferential to men, and become a doting, selfless mother.

"The veil is seen only when it is lifted" was published by the Women's Studio Workshop in Rosendale, NY. WSW is funded in part by The New York State Council on the Arts, the Andy Warhol Foundation for the Visual Arts, and the National Endowment for the Arts. This project was also funded by Cowles Charitable Trust and Windgate Charitable Foundation.

Many thanks to all of the staff of WSW; especially Chris Petrone and Erin Zona for their amazing help and generosity and to Sarah F. Gordon, Marisa Malone and Laura Salgarolo for their support.

I would also like to thank a lot the "Femmes Nomades" association, especially Maria Antonia Pingitore for her help on data research and Valentina Sanseverino for her support.

All data came from research done between October 2016 and January 2018, through different databases, reports and surveys. You can find the original documents on the Internet, using the source information. The first section of the book is based on statistical data, generally collected on global samples. The second section is based on surveys of reported data, generally by a smaller sample of selected persons. You can find most of them on the Internet in different university databases.

Text is set in Frutiger LT Std 95 Ultra Black. All images are silkscreen, in 4 colors.

This is book no. 19 of 49 copies.

[...] postfeminism means that you can now work outside the home even in jobs previously restricted to men, go to graduate school, pump iron, and pump your own gas, as long as you remain fashion conscious, slim, nurturing, deferential to men, and become a doting, selfless mother.
education

by the age of 15

boys are 8% more likely than girls to report that school is a waste of time

1 men and women think women are inferior to men
5 modes of transport: car, bus, van, train, plane and bicycle

Finally, schools have made education compulsory for all children.
men initiate salary negotiations

4 times more often than women do

25% women and 32% men perceive women leaders as competent or liked, but never both
30% of people agree with the use of quotas, but when there is a bias against women in election processes, more than 50% of men with degrees agree with them.

When women negotiate, they ask for 30% less money than men do.

Women leaders are perceived as competent but never liked, while men are liked but never perceived as competent.

25% of women and 32% of men perceive themselves as leaders.

There's more money in the ecosystem, but never both.
in the U.S.A. among women who are planning to leave their company only 2% say they'll leave to focus on family.
less than 30% of people agree with the use of quotas, but when told there is a bias against women in the selection process, more than 70% agree with the use of quotas.

81% of countries that have more than 30% of women in parliaments.

In 2016

More Women, but Not Nearly Enough, 2012
Tali Mendelberg,
Christopher F. Karpowitz
27% of women parliamentarians believed that the media had disseminated images highly contemptuous or sexually charged, 44% say they received threats of death, rape, or abduction during their term.
if his wife burns the food, argues with him, goes out without telling him, neglects the child

34% of boys and 48% of girls consider a husband to be justified in beating his wife between the ages of 15-49

Of sexual assaults, only 5.6% are reported, but this may be a vast undercount. Women and men said they didn't know that was illegal. In the UK, on average, there were 5 times more sexual assaults reported in 2008 than in 2010. Still, the numbers are down by 17% since 2008. It is likely that many assaults go unreported.
women who feel objectified are:

- likely to exhibit sexual agency
- likely to internalize objectification
- 10% more likely to exhibit unprotected sex
- less likely to exhibit protected sex
- 9.5% less likely to use the Pill

13% of college boys who are sexually active reported using tactics to get their unwilling partners to have sex with them.

Few who experienced sexual assault in childhood and women, 2007. 80% women.
